FIND WHAT WILL WORK BEST FOR YOU

Your choice of scalable log management solution should let you do more with your security and performance data. Regardless of your company or team size, event and data stack, technologies, and configurations, Graylog has the right option to fit your needs.

GRAYLOG OPEN

Built to open standards, Graylog Open provides the core centralized log management functionality you need to collect, enhance, store, and analyze data. Support is through Graylog's online resources, community, and other Open groups.

GRAYLOG OPERATIONS

Operations and DevOps teams, built on the Graylog platform. Graylog Operations is designed to maximize your systems' uptime, alert you to issues and outages, enhance productivity, and meet data retention requirements for larger teams and complex situations.

GRAYLOG SECURITY

Graylog Security delivers on all of the promises of the traditional SIEM without all the complexity, alert fatigue, and high costs. Built on the Graylog platform, Graylog Security reduces the strain on your cybersecurity staff, improves your overall security posture, and reduces risk. Technical support included.
